FOR IMMEDIATE RELEASE

CENTRAL CONCRETE CONTRIBUTES TO AN AWARD WINNING COMMUNITY PROJECT

Houston, Texas – February 9, 2012 – Central Concrete Supply Co., Inc., a U.S. Concrete, Inc. operating company, today announced that it has received the 2012 AGC National Community Award as one of the contributors to the “Camp Via West” project in Cupertino, California. The “AGC in the Community Awards” will be given during the Opening General Convention Session at AGC of America’s 93rd Annual Convention on March 14th in Honolulu, Hawaii.

Camp Via West (formally known as Camp Costanoan) is a nonprofit camp that has served individuals with special needs and disabilities since 1945. The camp was selected by AGC of California’s Santa Clara District as the community organization to benefit from AGC’s charitable arm members expertise. Several areas at the camp were identified by AGC member services for renovation and repairs. As a AGC Santa Clara District member, Central Concrete supplied 45 cubic yards of high quality, environmentally friendly concrete color mixes (Colorfast EF®) that were used in the trail from the camp to the sports court. The trail was needed to replace a muddy and rutted dirt trail that made it difficult for disabled youth campers with wheel chairs to access the sports court facility to view or take part in the activities. Central Concrete’s Westside Concrete Materials has also contributed numerous other materials needed to complete the work.

“We’re very proud to be able to support the project and contribute to such a great cause,” said District Chair Dave Perry, Vice President of Marketing and Sales for Central Concrete Supply Co. “We have an ongoing commitment to be a positive member of our community and lend a helping hand when possible.”

ABOUT U.S. CONCRETE

U.S. Concrete services the construction industry in several major markets in the United States through its two business segments: ready-mixed concrete and concrete-related products; and precast concrete. The company has 102 fixed and 11 portable ready-mixed concrete plants, seven precast concrete plants and seven producing aggregates facilities. During 2010, these plant facilities produced approximately 3.8 million cubic yards of ready-mixed concrete from continuing operations and 3.1 million tons of aggregates. For more information on U.S. Concrete, visit <http://www.us-concrete.com>.
